COMPETENT  
ADVISOR IN ALL  
ASPECTS OF  
PACKAGING.**

**THOMAS HORNA**

CEO HORNA GMBH VERPACKUNGEN

# GET TO KNOW HORNA.

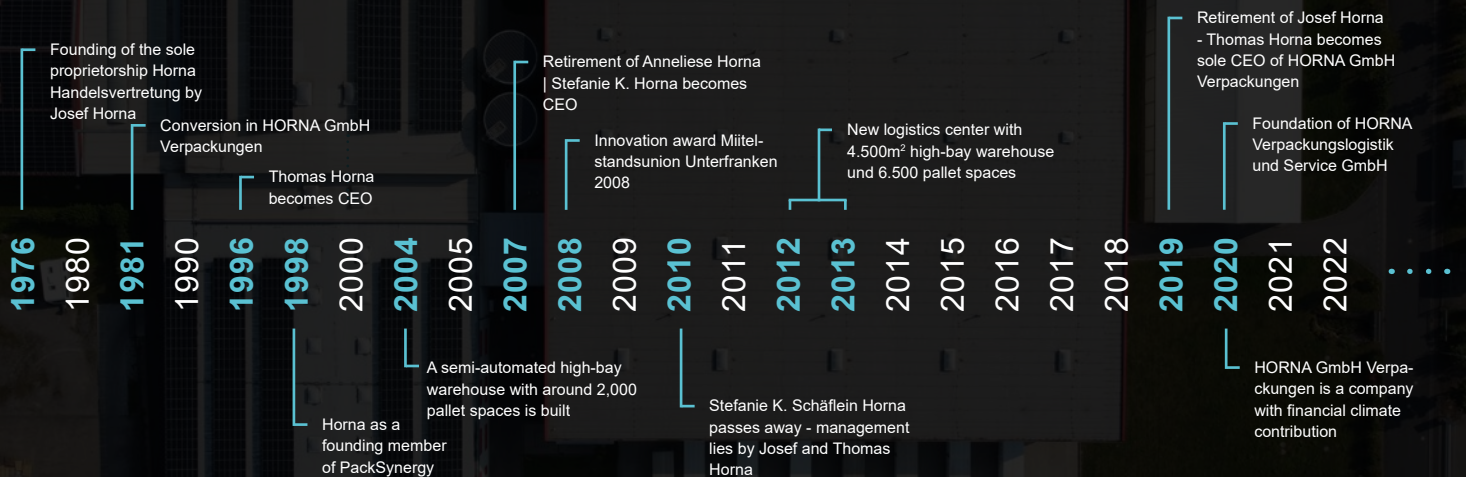

HORNA GmbH Verpackungen is a family-run, medium-sized company with more than 47 years of experience in the packaging industry. With tireless commitment, optimum advice, flexibility and a large selection of products, our approximately 60 employees and trainees ensure that you receive perfect support in all areas relating to packaging.

Whether standard solutions or the individual implementation of your in the field of packaging, packing lines and machines - as a system and compo-

nent supplier we take on every challenge and offer you the perfect solution!

In doing so, we never lose sight of our goal of operating as climate-friendly as possible on the market, in line with our and our sustainability goals.

We have been a company with a financial climate contribution since 2020.

# OUR TEAM.

## A STRONG TEAM IS THE BASIS FOR SUCCESS!

The key to our success is our great team. Each and every employee constantly outgrows themselves and pushes the boundaries of what is possible.

Ongoing training and state-of-the-art equipment keep us up-to-date.

We create innovation while supporting, respecting and inspiring each other - every day.

We work with a focus on results and do everything we can to provide you with perfect support in all aspects of packaging.

We create an inspiring and interesting working environment, because we are convinced: together we can achieve anything.

WONDERFUL PEOPLE WORKING TOGETHER AS A TEAM

DOGS THAT SWEETEN OUR OFFICE DAY EVERY DAY

YEARS OF EXPERIENCE AND EXPERIENCE IN THE PACKAGING INDUSTRY

# YOUR BENEFITS.

We offer our customers optimal advice and the best possible selection of products, quality and flexibility at all times. We accept every challenge and want to further develop our successful family business. Business management,

goal-oriented and successful work for the benefit of our employees, the company and also the customers is always the focus.

## WE ADVISE YOU PROFESSIONAL

With our many years of expertise and experience in all aspects of packaging, we provide you with personal and expert advice tailored to your individual requirements! Competent, reliable, flexible.

## WE MAKE THINGS SIMPLE

We offer system solutions „from a single source“: from consulting, planning, implementation, supply of accessories and spare parts, delivery of goods, to maintenance and repair of machines.

## WE LIVE SUSTAINABILITY

Careful, responsible use of resources in all processes is an essential component of sustainable business at HORNA. We have been a company with a financial climate contribution since 2020.

## WE ARE ALWAYS UP TO DATE

We offer you packaging solutions and services that meet the new challenges of the market. We adapt to your requirements and constantly expand our markets and our product range.

# OUR SERVICES.

## WAREHOUSING

Our warehouse logistics covers a total storage area of 20,000 m<sup>2</sup> and has 23,300 storage spaces. This enables us to keep more than 2,200 items in stock at all times. We store for you and

deliver “Just In Time” and “Just in Line” with our own fleet on call. In doing so, we rely on the most modern EDP and logistics to “nestle” with your processes.

## TRANSPORT LOGISTICS

We deliver for you reliably and on time: Our large standard program as well as our own fleet of vehicles enable us to deliver very quickly - as sustainably as possible, with fuels with climate contribution, with carefully selected forwarding partners or parcel shipping with climate contribution.

We deliver directly to the production site, to the packing line or to the specified warehouse - just as you wish!

## SERVICES

HORNA Verpackungslogistik & Service GmbH: Your modern service provider in the packaging sector for confection and co-packaging. We take over the packing and loading of e.g. displays with your products - particle-free packaging possible.

In addition, we take over the shipping, if desired. Our services can be flexibly adapted to your needs.

# OUR PRODUCTS.

We have over 19,700 items on offer and keep over 2,200 products constantly in stock.

Whether cardboard boxes, container boxes, color wheel packaging, pallet securing, inner packaging, filling and padding materials, adhesive tapes, corrosion protection, disposable and reusable packaging, film packaging, hygiene products, shipping packaging,

labeling materials, or even machines and equipment - we are guaranteed to have the optimal, efficient, and cost-effective solution for you!

And if we don't have a suitable standard solution in our range, we will work with you to develop and test individual packaging for your specific needs.

**WE ACT  
SUSTAINABLE  
BECAUSE WE  
CARE ABOUT  
THE FUTURE.**

# OUR CLIMATE CONTRIBUTION.

With our entire DNA, we stand by a sustainable, environmentally conscious economic orientation and always act with a view to people and nature in order to make a contribution for future generations.

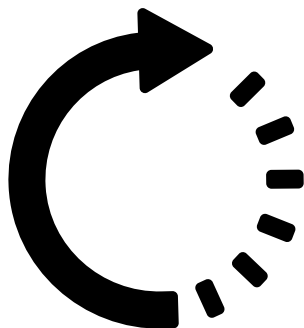

We always try to integrate the idea of sustainability in all our business areas. The careful and responsible use of resources in all our processes is therefore an essential element of sustainable business.

By offsetting our corporate emissions, we commit ourselves to climate protec-

tion and underline our commitment to sustainability.

In addition to avoiding and reducing CO<sub>2</sub> emissions, offsetting unavoidable corporate emissions through climate protection projects is an important step in holistic climate protection.

Our Climate contribution label ensures transparency regarding the offsetting of our CO<sub>2</sub> emissions and our involvement in national and international climate protection projects.

Our individual carbon footprint, which is calculated by ClimatePartner on the basis of our annual emissions, is used to monitor and continuously reduce our CO<sub>2</sub> emissions. This enables us to take measures in order to continuously reduce our CO<sub>2</sub> emissions each year.

# SUSTAINABILITY

Our sustainability strategy is based on the three pillars of ecological, economic and social sustainability.

The basis and guideline for this are the “Sustainable Development Goals” of the 2030 Agenda, i.e. 17 goals for sustainable development in accordance with the political objectives of the United

Nations. They are intended to ensure sustainable development worldwide on an economic, social and ecological level.

As a family-owned company, we attach great importance to social sustainability management. For this reason, we always focus on business management,

## A PART OF OUR MEASURES FOR A BETTER ENVIRONMENT.

We are continuously working to reduce our corporate emissions in all areas on an ongoing basis.

### VEHICLE FLEET

Exclusive use of electric and hybrid vehicles and conversion of the truck delivery fleet to fuel-saving technologies - fuels are sourced with a climate contribution.

### CHARGING STATION

A dedicated, publicly accessible e-charging station promotes charging options for electric and hybrid vehicles and facilitates their use and accessibility.

### BEES

Since 2020, we have kept our own beehive on the premises, because bees are an important element for the existence as well as functioning of our ecosystem.

goal-oriented and successful work for the benefit of our employees.

This includes reasonable working hours and flexible working models, fair payment models, equal pay, occupational safety and health protection. Our measures also include job security, permanent employment contracts and

consideration for special private situations.

### **ENERGY EFFICIENCY**

Exclusive use of energy-saving LED lighting in the offices, green electricity as well as saving energy through photovoltaic on the roof of the company building.

### **BIKE LEASING**

To reduce emissions from commuting, our employees can lease a bicycle at a reduced tax rate to get to work in a climate-friendly way.

### **DIGITALIZATION**

Processes and advertising measures are almost completely digitized, so that we only need paper in a few areas (procurement with climate contribution).

# PACKAGING SOLUTIONS WITH FUTURE.

**REDUCE YOUR CARBON FOOTPRINT WITH  
HORNA GMBH VERPACKUNGEN!**

With innovative products and processes, we continuously develop our company and offer you innovative, close and efficient packaging solutions that meet the new challenges of the market. Therefore, we constantly put our own processes and products to the test in terms of sustainability and climate contribution.

This enables us to continuously expand our product range with sustainable, recyclable as well as products with a climate contribution, and to eliminate environmentally unfriendly products and replace them with sustainable al-

ternatives - without sacrificing product quality, selection and design.

Almost every area of our product portfolio - from cardboard packaging, adhesive tapes, filling and cushioning materials, to plastic packaging - has already seen the arrival of sustainable, recyclable as well as packaging solutions with a climate contribution, thus contributing to the conservation of resources as well as the reduction of environmental impact.

## RECYCLABLE PAPER SOLUTIONS

Paper is one of the most sustainable products because it is made from renewable raw materials. Our cardboard boxes, corrugated cardboard products and other paper packaging solutions without plastic content are recyclable and can thus be fully returned to the material cycle. This protects natural raw materials, saves energy, and reduces greenhouse gas emissions and waste volumes.

## BIOLOGICAL RAW MATERIALS

Plastic solutions, such as bubble wrap, have been expanded to include alternatives made from biological raw materials, paper or PCR plastic. Many of the products are FSC and/or Blue Angel certified. Sustainable plastic solutions provide an alternative to petroleum-based plastic and are partially compostable and/or biodegradable. Switching to alternative materials reduces our dependence on petroleum products such as plastic and thus also the negative impact on the environment.

# OUR NETWORK.

As the leading packaging network in Europe, PackSynergy links local packaging industry champions and high-performance suppliers across borders. The basis for this is created by shared values that strengthen cooperation while maintaining respect for independence. Our members have a European focus and at the same time are firmly anchored in their local markets. PackSynergy opens up European markets for medium-sized companies, promotes the exchange of knowledge between partners and pools the strength

of over 20 local champions in strategic purchasing. With a strong own brand, a clear growth strategy and based on binding values, PackSynergy strengthens its partners for the challenges of the future. You as a customer benefit from this, because PackSynergy member companies combine handshake quality and international size, market knowledge and European performance, reliability and innovative strength.

## **PACKSYNERGY® MEANS FOR PARTNERS AND CUSTOMERS:**

- » Competence in a network from a single source
- » High quality product and system solutions
- » Market knowledge: knowledge advantage
- » Innovative strength & reliability
- » Purchasing power
- » Flexibility
- » Europe-wide delivery capability
- » Best service with heart and mind
